linking patients with health professionals

accession

the benefits

Accession is an Intrahealth product and service that allows and encourages the participation of patients in managing their health.

Involves patients in their care

Accession allows patients to actively participate in their care.

Through the Accession on-line network patients can access information directly from their GP and be fully involved in managing their health.

Patients can make appointments, check results, send results and access personal health information.

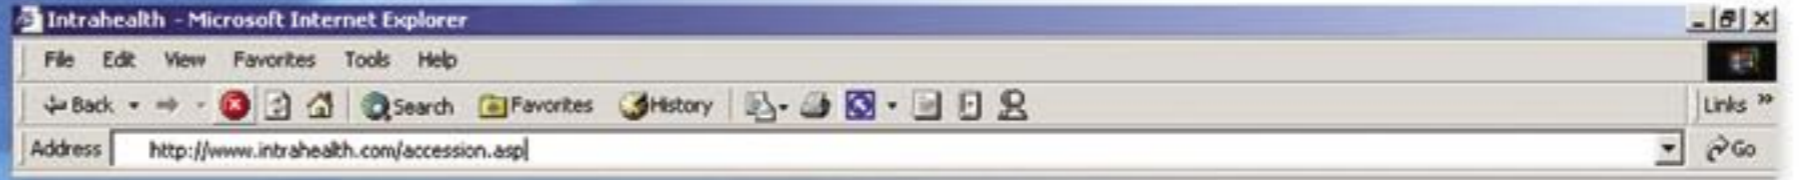

Helps patients find a doctor

Through Access Provider Search a patient can quickly and easily locate a list of local doctors, or other healthcare professionals, who are available for them to visit - with a single mouse click!

Allows online access to other doctors

Now it is easier than ever for GPs to interact with Specialists. Through pre-formatted referral templates GPs can refer patients, with all of the required information, to the appropriate specialist quickly and easily - online.

Patients can make appointments, check and send results and access personal health information.

A patient can quickly and easily locate a list of healthcare professionals, who are available for them to visit.

Better medication management

Accession helps patients to actively take part in their medication management.

Patients can access information on their regular medications, search for more data on the medicines, disease indications or find other relevant knowledge quickly and easily.

Patients can also re-order medications by requesting prescriptions from their Doctor.

Permits pharmacy access

A distinct version of Accession allows pharmacies to access information on their network of designated practices and view prescription orders placed by the doctors.

Patients can view medications and request repeat prescriptions online.

Patients can check the requirement and frequency of regular checkups.

Intrahealth

powering clinical
innovation

Who uses Intrahealth software?

- Primary care providers -
eg: General Practitioners,
Community Health
Professionals
- Specialist clinicians -
